Prevalence & severity of gum conditions increases with the following risk factors. In fact, 90% of all systemic diseases have an oral manifestation & gum disease can affect major organs. Eliminating gum disease is especially important to the oral & overall health of the following patients (please indicate which apply):

TOBACCO USE Yes No

Tobacco users are more likely to develop gum disease which is more severe & more difficult to eradicate. Gum disease itself has recently been linked with an increased risk for heart disease. Since tobacco users are already at an increased risk for heart disease & since gum disease only worsens that risk it is vitally important for tobacco users to do whatever is necessary to eliminate gum disease.

- **Current Tobacco User:** Yes No If yes, do you want to quit? Yes **Contemplation Phase** No
 What form: cigarettes pipe chew marijuana e-cigarettes Other
 How much / day For How Long?
- **Previous Tobacco User:** Yes No If yes, when did you quit?

OTHER SYSTEMIC DISEASES

- **Diabetes:** Yes No

Diabetes is a well-known risk factor for gum disease. Research is confirming that untreated gum disease makes it harder for you control your blood sugar. Eliminating gum disease improves blood sugar control.

What type? Type I Type II Date of last HbA1c:

How is your diabetes control? Good (<7% A1c/140 mg/dL) Fair (7-9% A1c/140-220 mg/dL) Poor (>9 A1c/>330mg/dL) Don't Know

- **Rheumatoid Arthritis (RA):** Yes No

There is a bi-directional connection between RA & gum disease. If you have arthritis you are at an increased risk for gum disease. Emerging research suggests, eliminating gum disease & keeping it at bay can lessen the crippling effects of arthritis.

- **Cardiovascular Disease** Yes No If yes, please specify

Gum disease is now a recognized risk factor for heart disease. If your gums are inflamed, bacteria from your mouth can get into your blood stream & lodge in your heart vessels. Eliminating gum disease can lower your risk for heart disease & stroke.

GENETICS

- **Family History of Gum Disease:** Yes No Don't know If yes, who

Some people are genetically prone to developing gum disease even if they take care of their mouths. Identifying these individuals & getting them into early intervention treatment may help them keep their teeth for a lifetime.

- **Family History of Diabetes:** Yes No Don't know If yes, who?

Diabetes is a well-known risk factor for gum disease. Research is confirming that when left untreated gum disease makes it harder for you to control your blood sugar. Elimination of gum disease can improve your blood sugar control.

- **Family History of Alzheimer's Disease (AD):** Yes No Don't know

Gum disease has been linked with an increased chance for developing AD later in life. If you have a family history, you are already at increased risk. Keeping gum disease at bay over your life span can lower your risk for developing AD.

STRESS Is your stress level high? Yes No

Are you currently going through any life altering events like Loss of job Divorce Death in Family Moving?

Stress is a well-known risk factor for gum disease can lower your resistance to diseases like gum disease.

OVERWEIGHT Are you overweight? Yes No List height List weight

Being overweight is now recognized as a disease & a strong risk factor for gum disease. Obesity & gum disease are both risk factors for heart disease & diabetes. If you are over your ideal weight it is important to eliminate gum inflammation to lower risks for more serious health problems.

BMI = (703 x weight in lbs.) ÷ (height in inches x height in inches). Overweight BMI = 25.0 to 29.9 & obesity >30.

MEDICATIONS Some drugs can affect your oral health. Are you taking any of the following?

Dilantin **Ca+ Channel Blockers** **Immunosuppressant's for organ transplantation** **Anti-depressants**
HORMONES Do any of the following apply? **Puberty** **Pregnant** **Menopause** **Post-Menopause** **Nursing**

The presence & lack of certain hormones during puberty, pregnancy & menopause may impact the gingival health. Puberty includes gingivitis & periodontitis, pregnancy includes pregnancy gingivitis & menopause includes menopausal gingivostomatitis, which manifests itself as dry or shiny, bleeding & ranges from abnormally pale to deep red.

SLEEP APNEA Have you ever been diagnosed with Sleep Apnea? Yes No

Lack of quality sleep & sleep apnea are very serious. Sleep apnea is linked to gum disease and many other diseases. Part of overall wellness is to keep gum inflammation to a minimum, especially if you have sleep abnormalities.

VITAMIN D STATUS Have you ever had your Vitamin D levels tested? Yes No If yes, how long ago?

Low vitamin D levels have been linked with higher risk for gum disease and many other diseases. Many people are chronically low in vitamin D and do not know it. It is important to optimize vitamin D levels if they are low to prevent disease.

I, the undersigned, certify that all the medical & dental information provided is true to the best of my knowledge, & I have not knowingly omitted any information.

Patient Privacy Consent Form

Privacy of personal information is an essential part of our office providing you with quality care. We understand the importance of protecting your personal information & are committed to collecting, using & disclosing your personal information responsibly.

Our privacy policies and procedures comply with federal legislation called the Personal Information Protection and Electronic Documents Act (PIPEDA). For more information on our privacy policies and practises you may contact our Privacy Officer, Wendy Pritchard at Wendy@birchlanddental.ca

All team members who encounter your personal information are aware of the sensitive nature of the information that you have disclosed to us. They are all trained in the appropriate uses and protection of your information.

In this consent form, we have outlined what our office is doing to ensure that:

Only necessary information is collected about you.

- We only share your information with your consent.
- Storage, retention & destruction of your personal information complies with existing legislation & privacy protocols.
- Our privacy protocols comply with privacy legislation, standards of our regulatory body & the law.

Birchland Dental Centre will collect, use, and disclose information about you for the following purposes.

- To offer & deliver safe treatment, patient care and ensure continuous high-quality service
- To assess your health needs, advise you of treatment options and for follow up treatment
- To enable us to contact, establish and maintain communication with you in booking and confirming appointments
- To communicate with other treating health-care providers, including specialists and referring doctors
- To allow us to maintain communication and contact with you to distribute health-care information
- To comply with legal & regulatory requirements, including the delivery of patients' charts & records to governing bodies in a timely fashion, when required, according to the provisions of the Regulated Health Professions Act
- To comply with agreements/undertakings entered voluntarily by the member with governing bodies, including the delivery and/or review of patients' charts and records in a timely fashion for regulatory and monitoring purposes
- To a Third Party (GEM Dental Consultants) for teaching and quality assurance purposes, on an anonymous basis
- To permit potential purchasers, practice brokers or advisors to evaluate the practice
- To allow potential purchasers, practice brokers or advisors to conduct an audit in preparation for a practice sale
- To deliver your charts and records to the office's insurance carrier to enable the insurance company to assess liability and quantify damages, if any
- To prepare materials for the Health Profession Appeal and Review Board (HPARB)
- To assist this office to comply with all regulatory requirements
- To comply generally with the law
- To complete and submit claims for third party adjudication and payment
- To bill for goods and services
- To process credit card payments
- To invoice and collect unpaid accounts

Our office will not under any conditions supply your insurer with your confidential medical history. In the event this kind of request is made, we will forward the information directly to you for review, and for your specific consent. When unusual requests are received, we will contact you for permission to release such information. We may also advise you if such a release is inappropriate.

I have reviewed the above information that explains how Birchland Dental Centre will use my personal information, and the steps Birchland Dental Centre is taking to protect my information. I agree that Birchland Dental Centre can collect, use, & disclose personal information as set out in the office's privacy policy.
